IN THE CLAIMS:

This listing of claims will replace all prior versions, and listings, of claims in the application:

1.   (Previously Presented) A method for enabling interactive access to and verification of agent commission information using a data processor, said method comprising the steps of:

receiving agent identifying information and agent commission information, wherein said agent identifying information comprises at least one selected from the group consisting of a name, an address, and a telephone number;

analyzing and sorting the received agent identifying information and agent commission information;

saving the agent identifying information and the agent commission information;

providing an interactive display of the agent identifying information and the agent commission information;

providing interactive access to a display of detailed agent identifying information; and

providing interactive access to a display of detailed agent commission information.

2.   (Previously Presented) The method of claim 1, wherein said agent identifying information further comprises:

a writing code.

3.   (Original) The method of claim 2, wherein said detailed agent commission information comprises:

policy information; and

commission detail information.

4.   (Original) The method of claim 3, wherein said policy information comprises:

a policy number;

a client name;

a product name;

a company name; and

an issue date.

5.   (Original) The method of claim 4, wherein said commission detail information comprises:

an estimated commission processing date for a commission;

a face amount of a policy;

a premium for a policy;

a mode for the premium of a policy; and

an issue age of a policy

6.   (Canceled)

7.   (Previously Presented) A computer readable medium including a software application for enabling interactive access to and verification of agent commission information, said software application comprising:

one or more instructions for receiving agent identifying information and agent commission information, wherein said agent identifying information comprises at least one selected from the group consisting of a name, an address, and a telephone number;

one or more instructions for analyzing and sorting the received agent identifying information and agent commission information;

one or more instructions for saving the agent identifying information and the agent

commission information;

one or more instructions for providing an interactive display of the agent identifying information and the agent commission information;

one or more instructions for providing interactive access to a display of detailed agent identifying information; and

one or more instructions for providing interactive access to a display of detailed agent commission information.

8. (Previously Presented) The computer readable medium of claim 7, wherein said agent identifying information further comprises:

a writing code.

9. (Original) The software application of claim 8, wherein said detailed agent commission information comprises:

policy information; and

commission detail information.

10. (Original) The software application of claim 9 wherein said policy information comprises:

a policy number;

a client name;

a product name;

a company name; and

an issue date.

11. (Original) The software application of claim 9, wherein said commission detail information comprises:

an estimated commission processing date for a commission;

a face amount of a policy;

a premium for a policy;

a mode for the premium of a policy; and

an issue age of a policy.

12. (Canceled)

13. (Previously Presented) A server system for enabling interactive access to and verification of agent commission information, said system comprising:

a receiving element for receiving agent identifying information and agent commission information, wherein said agent identifying information comprises at least one selected from the group consisting of a name, an address, and a telephone number;

a processing element for analyzing and sorting the received agent identifying information and agent commission information;

a saving element for saving the agent identifying information and the agent commission information;

a displaying element for providing an interactive display of the agent identifying information and the agent commission information;

a first interface element for providing interactive access to a display of detailed agent identifying information; and

a second interface element for providing interactive access to a display of detailed agent commission information.

14. (Previously Presented) The system of claim 13, wherein said agent identifying information further comprises:

a writing code.

15.   (Original) The system of claim 13, wherein said detailed agent commission information comprises:

policy information; and

commission detail information.

16.   (Original) The system of claim 15 wherein said policy information comprises:

a policy number;

a client name;

a product name;

a company name; and

an issue date.

17.   (Original) The system of claim 15, wherein said commission detail information comprises:

an estimated commission processing date for a commission;

a face amount of a policy;

a premium for a policy;

a mode for the premium of a policy; and

an issue age of a policy.

18.   (Canceled)

19.   (Previously Presented) The method of claim 1 wherein said agent identifying information includes a name, an address, and a telephone number.

20.   (Previously Presented) The computer readable medium of claim 7 wherein said agent identifying information includes a name, an address, and a telephone number.

21.　　**(New)** The method of claim 1 wherein the detailed commission information comprises a gross commission.

22.　　**(New)** The computer readable medium including a software application of claim 7 wherein the detailed commission information comprises a gross commission.

23.　　**(New)** The system of claim 13 wherein the detailed commission information comprises a gross commission.
